REMOTE SKILLS · LEGAL

Terms and Conditions

How we work together, what you can expect from us and what we expect from you. We keep this deliberately readable. If you have a question, just ask.

Version 3.1 Last updated 2 October 2026

In short

A brief summary with no legal status. The articles below govern.

- You must be 18 or older, also for free sign-ups.
- One-off purchases do not renew. You cancel subscriptions yourself in your account.
- A twelve month programme is a twelve month commitment. After that you can cancel any month, move on, or go your own way. If you choose a new programme or a higher level, a new twelve month term starts for it when you pay in instalments.
- What we develop remains ours; what you make remains yours, and you are responsible for what you publish.
- We always tell you when you are dealing with AI, and we ask the same of you towards your clients.
- Results also depend on your effort. The First Client Guarantee only applies under the conditions in article 17.

ARTICLE 1

Applicability and related documents

These terms apply to all products, programs, software, training, guidance and other services of Remote Skills, LLC ("Remote Skills", "we"), and to the use of our websites and platforms. New products we offer later are automatically covered, unless we expressly agree otherwise.

Some products have additional arrangements. These take precedence over these terms, but only for the subject they cover:

- Additional Terms for 12-month Programmes (programmes with a twelve month commitment);
- Additional Terms for Instalment Payment (paying in instalments);
- Onboarding Terms (your start on the platform and the AI ground rules);
- Platform Terms of Use (day-to-day use of the platform);
- the white label licence you sign in the platform before you open a concept library;
- Affiliate Terms (when you recommend us with your own link);
- Data Processing Agreement (when you process personal data of your own clients through our platform);
- a quote or custom agreement we conclude with you in writing.

How we handle personal data and cookies is set out in the Privacy Statement and the Cookie Statement. When you get a refund and how delivery and withdrawal work is explained in the Refund, Withdrawal and Delivery Policy.

ARTICLE 2

Who we are for and minimum age

Our programs are intended for entrepreneurs and for people seriously building a business. If you buy something as a consumer, meaning not for your business or profession, statutory consumer rights apply in full. That applies in any case to the AI Starter products, the Startup Boxes and the mini courses, which we also sell to consumers.

Our programmes from AI Founder upwards (such as AI Founder, the AI Founder Box, AI Builder and the AI Founder OS) are aimed at business use. By taking part you indicate that you are acting for your business or with the concrete intention of starting one. If consumer rights nevertheless apply under mandatory law, they continue to apply.

Minimum age 18. You can only sign up, create an account or buy from us if you are 18 or older. This also applies to our free sign-ups, such as the Emigration Challenge, free mini courses and webinars. You confirm your age when you order and during your onboarding. If it turns out someone is younger, we stop access, delete the related data and refund anything already paid.

ARTICLE 3

When an agreement is formed

An agreement is formed as soon as you complete and pay for an order, accept a quote, pay an invoice, sign up via a payment link or start a trial. A free sign-up forms an agreement about the use of what you get for free.

When you order, we ask you separately to agree to these terms, to confirm that you are 18 or older and, where digital content is concerned, to consent to immediate delivery (see article 14). For programmes with a twelve month commitment or instalment payment we also ask you to agree to the additional terms. We record those consents with the time and the version of the documents, so it is clear to both of us what was agreed.

Exactly what is included in your order is stated on the order page, the quote or the sign-up page of that product. If that page differs from these terms, the order page prevails as to the content and price of the product.

ARTICLE 4

How we work

Remote Skills is not a traditional online course. Depending on the product we combine knowledge, software, AI tools, templates, white label concepts with licence rights, assignments, feedback, live sessions, Q&As and personal guidance. Not every product contains the same components: what belongs to your product is stated on the order page.

AI develops quickly and our products develop with it. We may improve, replace or extend components, always with the aim of raising quality. If we remove an essential component you paid for, we provide an equivalent alternative or agree with you how we resolve it.

ARTICLE 5

Our products and services

Below are our current products and how you pay for them. The current content and price are always on the order page or in the quote, which also says exactly what is included.

Free	The Emigration Challenge, free mini courses, webinars and live sessions, the route finder and our scans. You pay nothing and take on no payment obligation.
Startup Boxes	One-off payment per box, or for all four together. No subscription.

AI Starter program (do it yourself)	One-off payment with at least twelve months of access. No subscription.
AI Starter Live Sprint	One-off payment, with the live sessions of the current edition and optionally a personal growth plan session.
AI Starter monthly	Monthly subscription: the software and new knowledge every month. Cancel any month.
Mini courses and bootcamps	One-off payment, such as Making money with Claude, ChatGPT or Grok and AI Web Studio in a Box. No subscription.
AI Founder Box	One-off payment for three months of access, or three monthly instalments that then stop by themselves. Including the twelve white label bestsellers with licence rights (article 18).
AI Founder Box Premium	The Box with personal guidance, the weekly live sessions, the First Client Guarantee and the skills library. One-off, or on request in three instalments.
Continuing after the Box	Monthly with a twelve month commitment (on your own, with live Q&As or with personal guidance), twelve months paid upfront, or just the software: Fullstack AI Studio Online (the starter) or Grow (the pro, with all tools and unlimited contacts), cancel any month. You choose.
AI Founder	Twelve month implementation programme. Monthly (twelve month commitment) or paid upfront in one go. Options with weekly live Q&As, a premium sprint or a personal 1-on-1 track.
AI Builder	Twelve month programme, on request.
AI Founder OS	The software: monthly with a twelve month commitment, or yearly.
Fullstack AI Studio	Online or Grow, monthly or yearly, with a 30-day free trial for new sign-ups. Cancel per month, or per year for an annual plan. White Label after a call: you then arrange the subscription yourself with the supplier, and we do the set-up.
MentorStack	Personal or Pro, monthly subscription, cancel any month.
OS Builder	Implementation sprint for Claude, one-off payment, on your own or with implementation sessions in a small group.

Quote & Invoicing Box	One-off set-up for your own business (the monthly fee for hosting and maintenance is agreed separately), or a twelve month licence to sell the box under your own brand, with a fee per box sold.
Turnkey AI Staffing Agency	One-off set-up and licence rights, then a monthly fee for the licence, tools and systems. Cancel any month.
Websites	A custom website for a one-off fee, optionally with the copy and images included. Hosting, maintenance and support run through a separate monthly package.
Extra growth plan generations	One-off credits that stay linked to your account for as long as you have access.
Coaching and guidance	Personal guidance, 1-on-1 sessions, live Q&As and group sessions: as part of a product or separately after a call (article 16).
Mastermind and events	Per edition, with their own cancellation terms that we announce in advance (article 15).

Some products we only sell after a call or by personal invitation (for example a personal deal rate, the 1-on-1 track or White Label). The arrangements from that call or invitation are then on your order page or in your quote.

ARTICLE 6

Duration, renewal and cancelling

One-off purchases

A one-off purchase is not a subscription: nothing renews and there is nothing to cancel. The access period is stated with the product, for example three months for the AI Founder Box or twelve months for the AI Starter program and for twelve months paid upfront.

Monthly and yearly subscriptions without a commitment

Think of AI Starter monthly, MentorStack, the Fullstack AI Studio and the Turnkey AI Staffing Agency. A monthly subscription continues month by month until you cancel and then stops at the end of the current month. A yearly subscription renews each year, unless you indicate before the renewal date that you want to stop. Periods already paid are not refunded pro rata.

Trial period

If you start a free trial (such as 30 days for the Fullstack AI Studio), you see in advance what the subscription costs afterwards. If you stop within the trial, you pay nothing. If you do nothing, the subscription starts automatically after the trial.

Programmes with a twelve month commitment

This applies to AI Founder in monthly instalments (also as an upgrade or at a personal rate), AI Builder, the AI Founder OS monthly and continuing after the Box monthly (for subscriptions started from 11 September 2026; anyone who started earlier keeps the option to cancel monthly). You take on a payment obligation for twelve months; the monthly amounts are a payment arrangement. After those twelve months the programme can be cancelled monthly. If you move to a new programme, a higher level or a new track, a new twelve month term applies to it when you pay in instalments. The details are in the Additional Terms for 12-month Programmes.

At any moment within those twelve months you can indicate in your account that you want to stop afterwards. There is no longer a notice period: you can still do this in the last month, and your programme then stops on the end date. After the twelve months you choose:

1. **Continue monthly.** If you do nothing, your subscription continues at the monthly rate that applies then, and from that moment you can cancel any month. No new twelve month commitment starts.
2. **Move on.** You switch to the next programme that suits you. We settle what is needed, so you never pay twice.
3. **Go your own way.** You stop. Everything you made yourself remains yours.

Instalment payments

If you pay in instalments (such as the AI Founder Box in three instalments), the collection stops by itself after the last instalment. Cancelling in between is not possible; paying the remainder in one go is. See the Additional Terms for Instalment Payment.

How to cancel

You cancel yourself in your account, under Account and then Subscription, or by emailing info@remoteskills.nl from the email address of your account. You always receive a confirmation with the date on which your subscription stops.

ARTICLE 7

Results and collaboration

We do everything we can to help you move forward. The result also depends on things we do not fully control: your effort, your available time, your execution, your entrepreneurial skills and the market. We therefore cannot promise that everyone achieves the same results. Examples, testimonials and client cases are meant as inspiration and are not a guarantee. Please also read our Income Disclaimer.

Good collaboration takes effort from both sides: taking an active part, asking questions when you get stuck, keeping agreements, communicating respectfully and giving us the chance to help when something goes differently than expected.

ARTICLE 8

Prices and payment

The price on the order page, in the quote or on the payment page is the price you pay. We charge in euros through our payment provider Stripe. For larger amounts we only offer bank payments (such as iDEAL, Bancontact or Multibanco). Whether and how VAT is charged depends on your situation and is stated with the offer and on your invoice.

If you choose instalments or a twelve month commitment, the total payment obligation remains for the agreed term. If a payment fails, we contact you first; what happens next is set out in the additional terms of your product. If you paid for an entry product earlier and move up, we settle that as stated on the order page.

A personal rate or founders rate only applies to the product and period for which it was offered. Rates may rise for new clients; a running commitment keeps the agreed rate.

ARTICLE 9

Software, platforms and accounts

With most products you get access to one or more Remote Skills platforms, such as the AI Founder OS and the Fullstack AI Studio. Some software we also sell separately, such as the AI Founder OS, the Fullstack AI Studio and MentorStack.

Your access is personal, not transferable and intended for your own business. You are responsible for your login details and for what happens under your account. Do not share your account with others. If we see that an account is shared or used for something it is not meant for, we may temporarily block or end access.

Your access runs for as long as the product you paid for runs. After that, access to the components of that product stops, unless the order page says otherwise (such as the AI Starter program you keep after the Box). If you want to take your own data and documents with you, request this through your account or via info@remoteskills.nl.

Some AI tools work with your own API key from an AI provider. You then conclude your own agreement with that provider and the usage costs are yours (see the Onboarding Terms).

ARTICLE 10

AI in our services and transparency

You know when you are talking to AI. We use AI in, among other things, Max AI, the coaches, mentors and agents in the platform, the chatbots on our websites, the voice assistant and the tools that create copy, plans and images. When you talk to a chatbot or an AI voice, we make that clear, unless it is already obvious. We never let you believe you are talking to a human when that is not the case.

Synthetic voices and images. If we use a voice created or cloned by AI, or a digital version of a real person (for example of Max or one of our coaches), we say so. AI-generated images, audio and video that we publish and that resemble real people or events are marked as AI-generated.

When you use AI towards others. With our products you can build your own chatbots, voice agents, AI employees and AI content for your own clients. You are then the one deploying it, and you make sure that:

- people who talk to your chatbot, voice agent or AI employee know they are dealing with AI;
- AI-generated or edited images, audio and video that resemble real people or events (deepfakes) are recognisable as such;
- you only imitate or use the voice, face or name of a real person with that person's explicit consent;
- you do not use AI for deception, fraud, discrimination or anything else the law prohibits.

This follows among other things from article 50 of the European AI Act. AI output can contain errors: check it before you use it. Our AI does not give legal, tax, financial or medical advice. We do not use what you enter in our tools to train our own AI models; which AI providers we use is listed in the Privacy Statement.

ARTICLE 11

Your content and the rights of others

1. Everything you put on the platform yourself, upload, have created or publish (copy, images, documents, pages, share links, client portals, client plans, pitch pages and also what you make with our AI tools) is your content and your responsibility.
2. You make sure you have the right to use and share that content. This means, among other things: no copy, photos, logos, trademarks or other works of others without their permission; no personal data of your clients or others without a valid legal basis; and nothing that breaks the law, such as misleading claims, fraud, discrimination, incitement to hatred or illegal products.
3. AI tools can produce something that resembles existing work or an existing brand. So always check what you publish. We do not review your content in advance.
4. We may take content offline or disable a share link if we receive a report or see ourselves that the content is probably unlawful or in breach of these terms. Where possible, we tell you why in advance so you can respond. In case of repeated or serious breaches we may restrict or end your access.
5. If someone holds us liable for content you posted or created, you indemnify us: you bear the damage and the reasonable costs that follow from it, to the extent they are attributable to you. If you are a consumer, this only applies to the extent the law allows.

ARTICLE 12

Reporting content

1. Do you see content on a page shared through our platform (for example a share link, client portal or client plan) that you believe is unlawful, such as an infringement of your copyright or trademark? Report it via the "Report content" link at the bottom of that page or email info@remoteskills.nl.
2. Include in your report: the link to the page, which content it concerns, why you believe it is unlawful, and your name and email address (except for reports about child sexual abuse, which may be anonymous). State that your report is accurate and complete to the best of your knowledge.
3. We confirm your report, assess it carefully and as quickly as possible, and let you know what we decided. The person who posted the content is also informed, with the reason, and can object via info@remoteskills.nl.
4. Our point of contact for users and authorities is info@remoteskills.nl. We communicate in Dutch and English.

ARTICLE 13

Changes to our services

We may adapt, replace, update or extend software, AI models, training, templates, workflows and tools when we believe it improves quality. You cannot derive lasting rights from the content of an earlier version, except for what article 4 says about essential components you paid for.

ARTICLE 14

Delivery, digital content and withdrawal

Delivery

After your payment you receive your access by email right away: an account on the platform, or access to the product you bought. For the Fullstack AI Studio you receive your access by email after signing up. Personal sessions and live sessions are scheduled as stated on the order page. A website or custom work is delivered within the term we agree with you. If something is delayed, we let you know.

Right of withdrawal for consumers

If you buy from us online as a consumer, you in principle have fourteen days to change your mind. These rules apply:

- **Digital content** (videos, templates, prompts, software, downloads, the academy): when you order, we ask you separately and expressly to consent to immediate delivery and to acknowledge that you thereby lose your right of withdrawal once delivery starts. That checkbox is never pre-ticked.

- **Services** (guidance, live sessions, building a website): if you ask us to start within the withdrawal period and then withdraw, you pay for the part we have already delivered. If the service has been fully performed with your consent, the right of withdrawal lapses.
- **Subscriptions**: the withdrawal period runs from the day you take out the subscription, even if it includes a trial.

You withdraw with a clear email to info@remoteskills.nl or with the model form in the Refund, Withdrawal and Delivery Policy. We refund within fourteen days, using the same payment method. Business clients have no statutory right of withdrawal.

ARTICLE 15

Live sessions, events and retreats

Our live sessions and webinars run through our own live channel (and sometimes Zoom). For workshops, retreats, VIP days and masterminds we book venues, speakers and facilities; additional cancellation terms may therefore apply, which we announce in advance. If you cannot attend, we look together at a later edition where possible. We are not obliged to do so.

ARTICLE 16

Coaching, guidance and support

Some products include guidance: personal 1-on-1 sessions, weekly live sessions or Q&As, group sessions or implementation sessions in a small group. How much and which guidance belongs to your product, and for what period, is stated on the order page. Guidance is a best-efforts obligation: we use our knowledge and experience to help you move forward, but we do not take over your decisions and your execution.

We schedule personal sessions together. If you cannot make an appointment, let us know as soon as possible and we will find a new moment. Guidance belongs to the period you paid for. We usually record live group sessions and put them back in the academy so you can watch them again; if you prefer not to be on screen, turn off your camera or let us know.

Our coaches and guides do not give legal, tax, financial or medical advice. Outside the sessions Max AI and the chat help you day and night; questions to our team are answered as quickly as possible, without a fixed response time.

ARTICLE 17

First Client Guarantee

Some products include the First Client Guarantee, for example AI Founder and the AI Founder Box Premium. The guarantee only belongs to a product if the order page says so. The AI Founder Box (do it yourself), the AI Starter products, the standalone software subscriptions and the standalone products do not include a guarantee.

What we promise

We keep building with you until your first paying client is in. If you already have clients, we work towards at least three new clients or a first filled pilot. If that goal has not been reached at the end of the guided period of your product, while you have met the conditions below, we extend the guidance free of charge until it does succeed, for as long as you keep meeting those conditions.

Your part: the conditions

- you opt in to the guarantee during your onboarding;
- you work on your business according to the programme for at least 15 hours per week on average;
- you fill in the short check-in on the platform every week;
- you demonstrably work through the steps: you do the assignments, build your product and put your sales system live;
- you act on feedback and ask for help in time when you get stuck;
- your offer is honest and lawful, and your payments to us are up to date.

How we measure it

Your check-ins and progress are recorded on the platform. That record is the starting point for both of us. A paying client is a client who paid for your own offer, demonstrable with an invoice or proof of payment; a credit note does not count. If you occasionally miss a check-in (holiday, illness), let us know or catch up.

What the guarantee is not

The guarantee is not a money-back scheme and not a promise about revenue or income. The outcome is extra guidance, not a refund. If the pattern shows that you structurally do not take part and this does not improve after we have pointed it out, the guarantee lapses. The same applies if the agreement ends for a reason in article 20.

Making a claim

Email info@remoteskills.nl at the end of your guided period. We review your check-ins and progress together and let you know within a reasonable time how we proceed. Your statutory rights as a consumer always continue to apply.

ARTICLE 18

White label concepts and licence rights

With a number of products you receive licence rights to ready-made concepts that you may sell to your clients under your own name:

- **AI Founder Box** (also Premium): the twelve white label bestsellers, with twelve months of licence rights. If you pay in instalments, they are released per paid instalment: four, eight and with the third instalment all twelve with the full licence rights.

- **AI Founder**: the concept library. If you continue monthly after the Box, four concepts are added every month until all forty are released; if you pay a year upfront, they are all open right away.
- **Quote & Invoicing Box and Turnkey AI Staffing Agency**: the licence from your order or quote, with the arrangements that come with it.

Before you open a library, you sign the white label licence in the platform. That licence governs. In short: you may adapt the concepts and sell the result under your own name to your end clients; you may not resell, give away or share the library, the build prompts or the source documents as a package. When your licence ends, you no longer use the concepts for new sales; work you have already delivered you may keep maintaining for that client.

White Label of the Fullstack AI Studio works differently: you arrange that subscription yourself with the supplier, after a call with us.

ARTICLE 19

Partner and affiliate program

If you recommend our products with your own link, the Affiliate Terms (version 1.3) apply. They state which products earn commission, how much and when we pay out. For the Fullstack AI Studio only the Grow plan earns recurring commission; the Online plan earns no commission. Taking part gives no right to exclusivity and we may end a partner relationship if continuing is no longer reasonably appropriate.

ARTICLE 20

Termination

If the collaboration permanently no longer works, we may decide to stop, for example when agreements are structurally not kept, in case of undesirable behaviour or misuse, when confidential information is shared or when intellectual property is misused. We do this carefully and tell you why. Outstanding financial obligations remain.

If you want to leave a programme early yourself, you may. Because we reserve capacity, plan guidance and give access immediately, this in principle gives no right to a refund and a commitment or instalment arrangement continues. Exceptions are agreed in writing. Statutory rights that cannot be taken away from you as a consumer continue to apply.

ARTICLE 21

Intellectual property and licence

All intellectual property rights in our methods, software, AI systems, training and materials remain with Remote Skills, unless we agree otherwise in writing. This applies among other things to our programmes, course materials, frameworks, AI agents, prompts and prompt libraries, Claude projects, GPTs, workflows, automations, templates, dashboards, videos, presentations, copy and designs.

You receive a personal, limited and non-transferable licence to apply the materials within your own business. Everything you learn with us you may use in your own business, services, client work and marketing. Without our written permission you may not copy, publish, resell, rent out, distribute or include our materials in your own training or software product, in whole or in substantial part. For white label concepts article 18 also applies.

What you make yourself remains yours: your copy, website, offer, content, brand, client data, funnels and ads. The underlying systems, frameworks and templates you use for it remain with Remote Skills.

ARTICLE 22

Confidentiality

During our collaboration you may see non-public information of ours, such as business processes, software, source materials, pricing models, internal documentation and development plans. Handle it carefully and do not share it without our written permission. A separate non-disclosure agreement remains in force alongside this and prevails in case of conflict. We treat what you share with us with the same care.

ARTICLE 23

Privacy and data

How we process personal data and what rights you have is set out in our Privacy Statement and Cookie Statement. If you process personal data of your own clients or prospects through our platform, you are responsible for it and we are your processor; our Data Processing Agreement applies to that.

ARTICLE 24

Liability

We develop and maintain our programmes, software and services as carefully as possible, but cannot guarantee that everything is always error-free, uninterrupted or suitable for your specific situation.

To the extent the law allows, we are only liable for direct damage resulting from intent or deliberate recklessness on our part, and our total liability is limited to the amount you paid us in the three months before the event. We are not liable for lost revenue, lost profit, indirect or consequential damage, reputational damage, loss of data or clients, decisions you make based on our information or AI output, or failures at external suppliers.

For content you post or create, the indemnity in article 11 applies. These limitations do not apply to the extent the law mandatorily prescribes liability, for example towards consumers.

ARTICLE 25

Force majeure

In situations beyond anyone's control, such as internet or power outages, failures at cloud, software or AI suppliers, government measures, pandemics, natural disasters, illness, war or cyberattacks, we may temporarily suspend or adjust our services. If the force majeure lasts longer than sixty days, either of us may terminate the agreement without compensation.

ARTICLE 26

Changes to these terms

We may change these terms when our services or the law change. For important changes we inform you in advance by email or through the platform. If a change is materially to your disadvantage and your subscription or programme is still running, you may cancel as of the date the change takes effect. The most recent version is always on our website. If a provision turns out to be invalid, the other provisions remain in force and we replace that provision with one that comes as close as possible to its purpose.

ARTICLE 27

Governing law and disputes

Agreements with Remote Skills are governed by the law of the State of Florida (United States). If you live as a consumer in a country with mandatory consumer protection, such as the Netherlands or Belgium, you keep the protection that the law of that country gives you. We prefer to resolve disputes together first. If that does not work, we submit it to the competent court; as a consumer you may always go to the court where you live.

ARTICLE 28

Contact

Questions about these terms, a report or a complaint? Feel free to contact us.

Remote Skills, LLC
542 Washington AVE 42
Miami Beach, FL 33139
United States
Email: info@remoteskills.nl
Website: www.remoteskills.nl

By placing an order, signing up or using our software, training or services, you confirm that you have read and agree to these terms and conditions.

We believe in clear agreements, so we can both focus on what really matters: building a successful AI business.
